

FEZA 2023

9th CONFERENCE OF THE FEDERATION OF
THE EUROPEAN ZEOLITE ASSOCIATIONS

Portorož-Portorose, Slovenia

2-6 July 2023

*Porous materials
for a green future*

Dear colleagues,

On behalf of the Organising Committee, we cordially invite you to attend the **9th Conference of the Federation of European Zeolite Associations (FEZA 2023)**, which will be held from the **2nd-6th of July 2023** in **Portorož-Portorose, Slovenia**.

The conference is organized by the Slovenian, Croatian and Serbian Zeolite Associations, under the auspices of the Federation of European Zeolite Associations (FEZA), and aims to cover all aspects of science and technology associated with ordered porous materials – from zeolites and zeotypes to metal-organic frameworks and mesoporous materials. With **“Porous materials for a Green future”** as the theme, FEZA 2023 will address the most current environmental and energy solutions which are based on porous materials, in line with advanced synthesis procedures, characterization, modelling, data analysis approaches and testing for target applications.

Based on the great success of previous conference editions in Eder, Taormina, Prague, Paris, Valencia, Leipzig, Sofia and the virtual Brighton conference, we are confident that the FEZA 2023 will once again gather scientists from academia and industry with the goal of sharing the latest ideas for the mutual benefit of both basic research and industrial applications of porous systems. The conference will be preceded by a Pre-Conference School aimed at spreading the knowledge on fundamentals and application of zeolites and other porous solids, as well as promoting discussion among young researchers, PhD students and Post-docs.

We are very much looking forward to welcoming you in Portorož-Portorose.
